Professional Summary

Frontend Engineer with 3+ years of experience building scalable, high-performance web applications using React, TypeScript, and JavaScript (ES6+). Proven track record of end-to-end feature ownership, REST API integration, and maintaining 85%+ test coverage across enterprise-grade platforms. Experienced in Agile workflows, cross-functional collaboration, and delivering measurable impact in production environments.

Technical Skills

Frontend: React.js, Redux Toolkit, React Query, TypeScript, HTML5, CSS3, Tailwind CSS, AG Grid, Mapbox API

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Socket.io, MVC

Databases: MongoDB, SQL

Tools: Git, Vite, npm, yarn, CI/CD, Feature Flags, Jira, Azure DevOps, Postman

Professional Experience

Frontend Engineer

Jaipur, India

In Time Tec

July 2023 – Present

- PROJECT: NGAT – Enterprise Dispatch Management Platform — React, TypeScript, Redux Toolkit, AG Grid, Cypress, Jest
- Architected a scalable, reusable React/TypeScript component library for an enterprise dispatch platform, improving workflow efficiency by 30% and reducing UI errors by 20%.
- Led end-to-end delivery of a geofencing module – tenant-level radius defaults, pin drop validation, GPS coordinate handling – automating delivery tracking for operations teams.
- Built multi-customer shipment UI: partial orders, draft shipment tables, cancel/discard flows, and customer-specific commodity assignment interfaces.
- Resolved 10+ critical production bugs across invoicing, email delivery, and broker fee workflows; maintained 85%+ test coverage, reducing post-deployment defects by 15%.
- Managed DEV to TEST to MAIN release cycles via git cherry-picks with zero rollbacks; used feature flags for phased production rollouts.
- PROJECT: SEKADY – Construction Finance Platform — React, TypeScript, AG Grid, Mapbox API, Node.js
- Engineered an AG Grid invoice grouping module with bulk-action support, reducing manual processing steps by 40%.
- Integrated Mapbox API for real-time geo-information display and interactive project maps, improving UX for project managers.
- Collaborated with backend engineers to optimize high-volume API endpoints, improving response times by 15–25%.

Software Engineer Trainee

Jaipur, India

In Time Tec

January 2023 – June 2023

- Contributed to frontend and backend development of internal applications using React and Node.js/Express.js.
- Wrote unit and integration tests with Jest achieving 80%+ code coverage; integrated real-time features using Socket.io.

Professional Competencies

React.js / TypeScript / JavaScript (ES6+) • HTML5 / CSS3 / Tailwind CSS • REST API Integration / AJAX / JSON • Redux Toolkit / React Query / React Router • Cypress / Jest / React Testing Library • Git / CI/CD / Feature Flags • AG Grid / Mapbox API • npm / yarn / Vite • Agile / Scrum / Jira • Azure DevOps / Postman

Education

B.Tech in Computer Science

Jaipur, India
